CHRISTIE'S | **BIG SKY**
INTERNATIONAL REAL ESTATE

Greetings from Big Sky!

The 2013 year was an exciting one in Big Sky with plenty of local and real estate developments emerging to create a sense of rebirth in our small ski town and community. With Cross Harbor's acquisition of both Spanish Peaks and Moonlight Basin, one could almost feel the energy change overnight.

Like much of the country, real estate continued to trend upwards in 2013 and I am pleased to announce, that for the 4th year running, our Big Sky office outperformed all others in the area bringing together more buyers and sellers.

I am also very proud to announce that in 2013, for the second year in a row, I closed more transactions than any other agent in all of Big Sky!

ANNUAL SALES TRENDS

In 2013, Big Sky witnessed a surge in real estate sales growing significantly to 349 transactions, up from 220 in the previous year. As the attached graphs indicate, average sales price, median sales price, and overall gross sales volume also climbed in 2013. The average sales price rose from \$542,367 in 2012 to \$586,100 in 2013, while the Median Sales price rose from \$299,900 in 2012 to \$335,000 in 2013. Most encouragingly, gross sales volume, which was \$103,613,263 in 2012 adjusted upwards to \$165,678, 897 in 2013.

Sales volume precipitated a drop in inventory level, which is at a 6 year low of 360 active listings, down from 481 in 2012. The absorption rates are indicative of a correction in our market's supply and demand and if maintained, should continue to push pricing higher through the remainder of 2014.

The attached graphs exhibit an increase in sales in all categories including vacant land, homes and condominiums. Several of the sub-markets including Powder Ridge Cabins, Saddle Ridge Townhomes, Black Eagle Condominiums, Hidden Village Condominiums and vacant land parcels in Cascade, Antler Ridge, and Southfork Meadows all experienced an increase in sales.

DISTRESSED PROPERTIES – Going, Going....Almost Gone

2013 saw a drastic drop in the number of distressed (short sale or foreclosure) properties. In 2011, 39% of all sales were distressed properties, as compared to 23% in 2012 and only 13% in 2013. Presently, only 2% of our current marketplace is classified as distressed. Most are moving very quickly, and multiple offer situations are common. Patience and an ability to execute and perform on a contract quickly is required, especially as the number of distressed properties diminishes.

PRICING

As expected, with diminishing inventory, fewer distressed properties and the buyouts of Moonlight Basin and Spanish Peaks, Buyers in 2013 had to adapt to slightly higher pricing. In 2013, Big Sky witnessed an increase in excess of 50% in the number of properties sold over the \$700,000 mark.

With that said, successful Sellers continue to price their properties to reflect the market, but savvy Buyers are still finding values in Big Sky. As data for specific properties and developments does vary, I hope you will contact me for a more detailed analysis of your specific real estate interest and look forward to seeing you the next time you, your family and friends visit Big Sky.

CHOOSE YOUR REALTOR FOR THE RIGHT REASONS

Today's market can be very complicated. Now, more than ever, it is important that you work with a Broker that is truly a market expert. I hope to become and remain your Realtors of choice! For my family of clients, you are well aware that my business is built largely on clients who are referred to me by you. If you know of anyone who is considering the purchase of real estate in our area, please send them my way!

For a better understanding of the Big Sky market, please feel free to contact me at your convenience.

12 (up from 4 sales in 2012)

**All statistics have been taken from the local MLS and while deemed reliable are not guaranteed.*

** If you are currently working with another agent this mailing is not intended as a solicitation.*

**DISTRESSED PROPERTIES: Definition of SHORT SALE - A real estate short sale occurs when a homeowner negotiates a discount on the payoff amount on a property due to a mortgage company. This happens when a homeowner owes more money to banks and/or lien holders than what the property can currently sell. In order to sell a property that is "upside down" in equity, the bank must agree to accept less than what is currently owed on the property.*

** Definition of FORECLOSURE - The legal process by which an owner's right to a property is terminated, usually due to default. Typically involves a forced sale of the property at public auction, with the proceeds being applied to the mortgage debt.*

** Definition of REO -property owned by a lender, typically a bank, after an unsuccessful sale at a foreclosure auction. A bank will usually set the opening bid at an auction for the outstanding loan amount. If there are no bidders, the bank will legally repossess the property. This is typically the case as the amount owed on the home is probably higher than the value of this foreclosure property.*
